  TRUSTED EXPORTER

EXPORT-READY PRODUCT CATEGORY | SPECIFICATIONS CONFIRMED AGAINST BUYER REQUIREMENTS

Main Varieties

- Super Kernel Basmati - aromatic premium Pakistani Basmati for retail and wholesale markets.
- Kainat 1121 Basmati - extra-long grain format for premium import programmes.
- PK-386 Long Grain - established Pakistani rice variety for value-focused markets.
- IRRI-6 and IRRI-9 - non-Basmati long-grain options for high-volume commercial supply.
- C-9, KS-282 and Broken Rice - additional formats subject to current sourcing.

Buyer Discussion Points

- Variety, grain profile and processing form.
- Broken percentage, milling, polish and finish requirement.
- Retail, wholesale or bulk bag configuration and buyer branding.
- Container quantity, shipment schedule and destination port.
- Inspection, analysis or destination-specific documentation where required.

EXPORT NOTE

Final quotation is based on confirmed variety, grade, packing, quantity, destination port and shipment window.

SIGNATURE CATEGORY

Pakistani Himalayan Pink Salt is supplied across food-use, animal-use and decorative applications. Final grain size, form, analysis, packing and labelling depend on intended use and destination requirements.

Product Forms

- Food Use: fine powder, fine grain, medium grain and coarse grain formats.
- Chunks and crystals for grinders, gourmet retail, food service and commercial processing.
- Animal Use: lick blocks, salt bricks and custom livestock-use dimensions.
- Decorative Use: lamps, candle holders, blocks, bricks and selected gift products.
- Bulk and retail formats can be discussed according to order volume.

Commercial & Packing Options

- Retail jars, pouches, cartons and buyer-specific private-label presentation.
- Bulk food-service and industrial packing subject to product form and quantity.
- Grain size, purity, moisture, additives and analysis confirmed by intended market.
- Food-use, animal-use and decorative products are treated as separate commercial ranges.
- Inspection, labelling and destination compliance reviewed before final offer.

EXPORT NOTE

Food-use, animal-use and decorative pink-salt products are quoted separately according to intended use, specification and packing.

PRODUCT CATEGORY

Forage inquiries are reviewed according to bale size, compression, moisture, protein, harvest stage, packing, container loading and destination documentation requirements.

Main Products

- Rhodes Grass Hay - dried forage supplied in bale formats for livestock buyers.
- Alfalfa Hay / Lucerne - higher-protein legume forage for dairy, beef and equine markets.
- Wheat Straw - roughage and bedding material for livestock applications.
- Corn Silage - fermented whole-crop feed, subject to shipment and storage feasibility.
- Dry Stalks & Roughage - selected agricultural roughage formats by current sourcing.

Buyer Discussion Points

- Bale dimensions, approximate net weight and compression level.
- Moisture and protein targets where relevant to the product.
- Harvest season / cutting stage and current stock position.
- COA, phytosanitary certificate, inspection or origin documents as required.
- Container loading quantity, wrapping and shipment schedule.

EXPORT NOTE

Forage quotations are prepared after confirming current crop/stock, bale specification, analysis requirements, packing and destination.

NATURAL RESOURCES

Natural-resource inquiries are evaluated according to material identity, grade, assay or analysis, impurity limits, quantity, packing and destination requirements.

Pakistani Gemstones

- Sapphire - selected stones subject to colour, clarity, size and current availability.
- Red & Pink Jasper - natural material for decorative, lapidary and commercial use.
- White & Pink Agate - selected rough or processed supply based on buyer requirement.
- Other stones may be reviewed according to sample, grade and commercial quantity.
- Raw, cut or processed form is confirmed before quotation.

Industrial Minerals

- Pakistan-sourced mineral products reviewed against buyer specification and end use.
- Grade, assay, impurities and physical form are core technical parameters.
- Representative sampling and laboratory method can be agreed where required.
- Packing may include bags, jumbo bags, bulk or buyer-specific industrial formats.
- Source-specific analysis and availability are confirmed prior to binding offer.

EXPORT NOTE

Natural-resource transactions proceed on verified material identity, representative analysis, current availability and agreed commercial quantity.

Moroccan Rock Phosphate

AMAL TRADE PRIVATE LIMITED | INTERNATIONAL PRODUCT CATALOGUE 2026

MOROCCO OPERATIONS

Moroccan Rock Phosphate supply is coordinated through Al Amal Impex - Morocco operations. Buyer inquiries should define the required P2O5 / BPL, moisture, particle size, major chemical parameters, impurities, quantity, inspection and destination.

Technical Requirements

- Required P2O5 / BPL grade and acceptable tolerance.
- Moisture, particle size and required physical form.
- Major chemical components and impurity limits requested by the buyer.
- Source-specific COA / analysis reviewed against the final commercial requirement.
- Inspection and representative sampling requirements agreed before shipment.

Commercial Scope

- Bulk supply for fertilizer, phosphoric-acid and industrial processing buyers.
- FOB, CFR and CIF structures evaluated according to port, vessel and shipment window.
- Quantity, loading basis, laycan and destination determine the final commercial structure.
- Price and freight reconfirmed before a binding offer due to market volatility.
- Final source allocation and contract structure are confirmed in writing.

EXPORT NOTE

Moroccan Rock Phosphate is handled through Al Amal Impex - Morocco operations, with final COA, price and shipment basis confirmed in writing.
