Flavor	Brown sugar, molasses, cloves, peas, straw, vegetable
Acidity	High
Body	Medium

Brown Sugar

Molasses

Caramel

Licorice

Cloves

Straw

WHY HUILA

Huila is Colombia's largest specialty coffee-producing department, prized for volcanic soils, high elevation, and a microclimate that concentrates sugars slowly in the cherry. DURFAL works directly with growers across the region to preserve that quality from farm gate to export, with every lot cupped and documented before it ships.

This lot — Sample 428, reviewed by Q Arabica Grader Nicolas Tovar Jacobo — scored **84.00**: specialty-grade, clean cup, high sweetness, balanced acidity.

SCA SCORE

84.00
