BACKGROUND

Anyue is “China’s Lemon Capital” , Lemon planting scale, production and market share account for more than 80% of the Chinese market. It is the only lemon commodity production base county in China.

Sichuan Anyue in the subtropical monsoon climate zone, warm and humid climate throughout the year, four distinct seasons, rain and heat synchronization. Located in the eastern hilly area, compared with the deep hilly area, the terrain is more gentle, more deep soil; purple parent material based, young soil development, rich in mineral nutrient content . Some studies have suggested that lemons grown here have more vitamin C and other nutrients than American and Italian varieties.

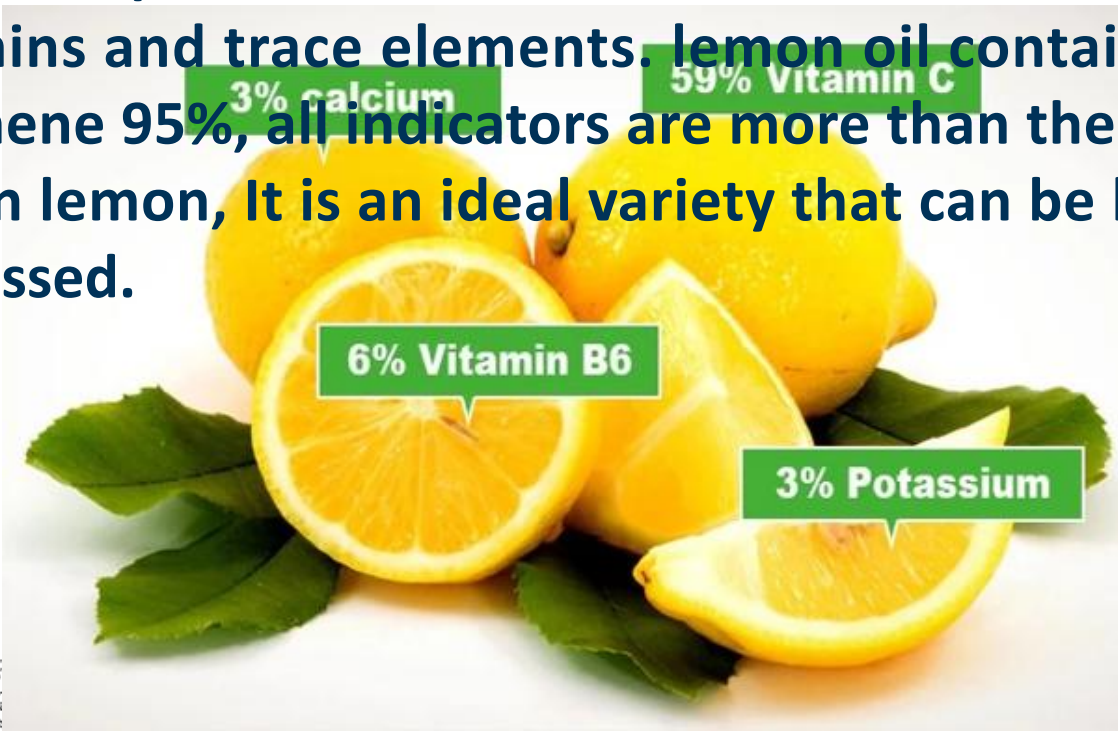

NUTRITIONAL VALUE

The Eureka is the predominant lemon grown in most countries, with the exception of Italy, Spain and some other Mediterranean nations.

According to the test by China Citrus Research Institute, Anyue Eureka lemon with lemon oil 7.4 per thousand, soluble solids 9.5%, 6.7% of citric acid, Vc58mg/100ml, juice rate 38%, Vp 2.5%, 3% pectin, and rich in inositol, limonene and other vitamins and trace elements. lemon oil containing citral 4%, limonene 95%, all indicators are more than the United States, Italian lemon, It is an ideal variety that can be both fresh and processed.

SOME FACTS & FIGURE

There are 41 lemon base towns in Anyue County, 289 lemon professional cooperative economic organizations, 27 lemon processing enterprises, planting area of 33,350 hectare and annual output of lemon 600,000 Ton.

Anyue fresh Lemon products are sold in more than 50 large and medium-sized cities in Beijing, Shanghai, Guangzhou, etc., and are exported to more than 30 countries and regions such as Russia, the United States, the United Kingdom, Japan, the United Arab Emirates, Hong Kong, Macao and Taiwan.,etc.
