Mission

The mission of Q.C.I is to provide product quality analysis, Pre-shipment inspection and third party stock control/management (warehousing) along the commodity value chain throughout Uganda, creating a secure environment for the successful conduct of international trade.

Product Quality Analyses (P.Q.A):

These include; • Laboratory tests (samples taken as a representative of the product for analysis) Photo reports.

Pre-shipment Inspection:

- Chemically smell-free container to be stuffed
- Checking of container locks
- Existence of proper container ventilation
- Checks and removal of stickers both inside and outside the container
- Provision of seals after stuffing of container
- Export verification processes; Quality & Quantity stuffed into a container, application of fumigants, provision of all paperwork after stuffing the container (Quality & weight certificates, tally sheets, photo reports)
