

Ghanaian hardwood, graded and shipped from Tema

Ghana Teak is a Ghanaian hardwood company based in Accra. We export teak and West African hardwoods as logs, squares and sawn timber, in full container loads from the Port of Tema.

Every shipment is graded to the Ghana Standard GS 1029:2017 and inspected by the Timber Industry Development Division (TIDD) at the mill and again at the port of exit. Volumes are measured in true cubic metres, not Hoppus.

Ghana was the first African country to issue FLEGT licences, and we supply FLEGT-licensed timber to buyers in the EU.

Incoterm	FOB Tema
Minimum order	1 × 20ft container
Teak capacity	500 m ³ / month
Other species	300 m ³ / month
